FreeGarden RAIN[®]

The FreeGarden RAIN 55 gallon rain barrel is designed with the homeowner/gardener in mind; affordable, attractive, easy to move, easy to install, and easy to use.

With as many as three bins easily fitting in the back seat of a regular sedan, the average buyer doesn't need to arrange special transport.

The barrel's square shape is ideal for attractive flush to wall and corner installations.

The tall spigot placement accommodates most watering cans, and four additional spigot mount points are provided lower on the barrel.

Manufactured with a maximum of recycled content (varying by color option), the FreeGarden RAIN contains enough virgin resin to ensure optimal product durability and lifespan.

Capacity	55 gallons	208 litres

FreeGarden™ EARTH

The FreeGarden EARTH compost bin is an efficient, durable, and economical tool that saves municipalities money and provides many benefits for homeowners and gardeners.

Manufactured of 100% recycled content, its single-unit main body construction means no difficult assembly, and no structural integrity issues in extreme weather conditions.

The animal and pest resistant lid twists for variable ventilation control, and covers a large 19.5" (49.5 cm) opening that offers easy, generous access to add material and maintain the pile.

FreeGarden EARTH compost bins fit easily in the back seat of a regular sedan for easy transport.

Enviro Pre-Order Program

Overview

Pre-order sales programs have residents order their product in advance to pickup on the day of the event. Customers place their order online via a website linked to your municipality web page. The cut off time will be typically 2 weeks prior to the event date to allow for the appropriate quantities to be shipped to sale location. The city or host organization will be responsible for distributing the pre purchased product to the customers on the proposed event date. The customers bring their purchase receipts for proof of purchase.

Pre-order sales program is a good option to a municipality which has a smaller population or the municipality does not have enough funds or projected participation to support a truckload sales program. Events are typically held in a convenient central location .

Promotional Campaign

Enviro World's marketing team will work in co-operation with you to develop a comprehensive promotional campaign which may include:

- An electronic media kit including a variety of promotional tools (e.g. press release, articles, and announcements) will be provided for use in local marketing efforts.
- Enviro World's expert marketing team will customize it to your municipal needs.
- Newspaper advertisement based on the population and the projected volume sales.

You can host a very effective pre-order sales event in your city or town at no cost to you.

Contact

If you are interested in hosting a rain barrel and/or compost bin Pre-Order sale or would like further information about the programs, please contact us using the information below.

FreeGarden **RAIN**[®] 55GL/208L Rain Barrel

What is a rain barrel?

A rain barrel is a system used by a homeowner to collect and store rainwater from the roof of a home. The water harvested is soft, fresh water that can be used for a variety of purposes, including lawn and garden watering, topping off pools, and washing cars. Water from home faucets is treated to a level allowing it to be safe to drink, while natural rain water has the pH level ideal for water and plant growth. Rain water harvesting helps to divert rain from storm drains, decrease the impact of runoff to streams, and minimize sewer overflows during heavy rainfalls.

Why use a rain barrel?

Rain barrels allow homeowners to collect and store rainwater to be used at a later time. In doing so, homeowners use less water from the faucet, conserving both water and energy in the home as well as the energy needed for water facilities to treat the water that would have been consumed. According to the U.S. Environmental Protection Agency, lawn and garden watering make up nearly 40% of domestic water usage during peak summer months. Rain barrels save most homeowners about 1,300 gallons of water each summer, reducing the demand for clean water. Rainwater Harvesting helps homeowners to reduce their water bills while conserving water and protecting the environment.

Why FreeGarden **RAIN**[®] rain barrel?

The FreeGarden[™] RAIN rain barrel was designed to be affordable, attractive, easy to install, and easy to use. Three bins fit easily inside the back seat of a regular sedan, making transportation simple. The 55-gallon barrel's square shape allows it to fit well flush against walls or in corners, and its neutral color provides an attractive appearance against any home. The FreeGarden[™] RAIN rain barrel also features an insect resistant stainless steel screen, a higher spigot to accommodate most watering cans, a childproof lid, and allows for easy multi-barrel installations. Manufactured with a maximum of recycled content, the barrel contains enough virgin resin to ensure optimal product durability and lifespan.

FreeGarden **EARTH**[™] 11 cubic FT/311L Compost Bin

What is compost bin?

A compost bin is a container, specifically designed and engineered for the collection and processing of organic materials into nutrient rich compost or humus. The finished compost or humus harvested from a compost bin through the composting process of decomposition is an excellent soil amendment providing much needed enrichment for your soil. A compost bin has features that enhance the decomposition process and help make your commitment to composting more efficient.

Why use a compost bin?

A compost bin is a tangible, visible tool to assist residents in self management of their kitchen and yard residuals. Using a compost bin allows for greater control over the process of composting and decomposition. Some municipalities require a compost bin or compost system by regulation. A compost bin addresses neatness, attractiveness and convenience. The purchase and use of a compost bin is an investment in the behavior changes associated with waste reduction and sustainability.

Why FreeGarden **EARTH** compost bin?

The FreeGarden[™] EARTH Compost Bin has many features that make it the composting tool of choice:

- One piece injection molded construction — no seams to come apart or assembly required
- Large capacity — 11 cubic feet/82 US gallons/311 litres
- Convenient offset, front harvest door
- Twist locking lid
- Vertical and horizontal columnar ventilation
- Conical shape means nothing gets stuck in corners and also provides for ease of lifting off to access the entire pile
- Rodent resistant
- Easy, large access 19.5 inch diameter lid opening
- 36" high x 31" diameter (92cm high x 78.5cm diameter)
- Made of recycled materials up to 100% recycled materials
- 10 year warranty
- Fits in any vehicle
- Committed, experienced sales representatives to help with any questions on products as well as technical assistance
- Proven and experienced in helping municipalities help their residents embrace backyard composting as a waste reduction method

FreeGarden **RAIN**[®]

- 55 gallon/208 litre rain barrel
- insect resistant stainless steel screen
- higher spigot accommodates most watering cans
- easy multi-barrel installations
- as many as 3 barrels fit in the back of a regular sedan
- 3 additional spigot mounting locations
- childproof lid and stable footprint
- square shape ideal for flush-to-wall and corner installations
- 34" h x 24" w x 24" d
- saves most homeowners 1,300 gallons of water each summer
- helps restore soil to ideal pH levels
- conserves water, protects the environment, and lowers water bills

FreeGarden[™] **EARTH**

- 11 cubic feet/311 litre compost bin
- large 20.25"/51.43cm top access opening
- robust, single-unit main body construction
- large, 12"x16" easy-access offset harvest door
- made of 100% recycled content
- pest and animal resistant lid
- fits easily in a car for easy transport
- diverts kitchen and yard residuals from landfill
- produces high quality soil amendment from kitchen and yard residuals
- reduces municipal collection costs and tipping fees
- lowers homeowner garbage fees (where applicable)
