

STORMWATER POLLUTION: WHAT DO YOU THINK?

- You may think littering is no big deal (it is).
- You may think that whatever runs into the storm drains gets treated before it reaches local rivers and streams (it isn't).
- You may think motor oil and other hazardous materials doesn't harm the water very much (it does).

Pollution seeps into the ground and is carried by stormwater (rain and snow) directly to our drinking water, streams, lakes and oceans. Contaminated stormwater is the #1 cause of water pollution in New Jersey. Simple actions, like proper clean-up after oneself and careful use of chemicals in the home, office and yard, are helpful ways for businesses and residents to protect the water.

Mansfield Township has ordinances aimed at reducing pollution from litter, fertilizer, oil, pesticides, detergents, animal waste, grass clippings and other debris.

For details, visit www.mansfieldtp.com/stormwater-management.

Thank you for keeping them in mind and doing your share.

Clean
Water **NJ**

**Keep grass, leaves and trash
out of storm drains.**

Don't feed wildlife.

Clean up after your pet

**Limit use of fertilizers
and pesticides**

**Properly handle hazardous
products.**

**NJ DEPARTMENT OF
ENVIRONMENTAL
PROTECTION**
